ADC'S 75 LB DRYER IS LIKE NO OTHER

Fall River, MA – June 16, 2006 – American Dryer Corporation's AD-78 dryer is the only full 75 lb. capacity dryer that can fit through a standard 36 inch door. With an ultra-shallow depth of just 34 inches and a wide basket for superior tumbling action, this 75 lb. dryer is the perfect fit for high-volume OPL and coin-op laundry applications.

The AD-78 features a rugged steel door with gasketless glass and a quiet reliable belt drive system for smooth trouble-free operation. ADC uses a state-of-the-art microprocessor control that provides simple and accurate operation. Included is a patented auto-drying feature that takes the guesswork out of cycle selection and avoids wasting energy by automatically shutting the dryer off when the load is dry. For optimal performance this control also prompts the operator to clean the lint screen when necessary. In addition, the "anti-wrinkle" selection is one of the most powerful options available. With this unique feature, the dryer will tumble without the use of heat after the drying cycle has finished.

About ADC

American Dryer Corporation designs and manufactures energy-efficient drying solutions for commercial coin-operated, on-premise and industrial laundry markets in 90 countries worldwide. ADC has devoted its business to providing dryers that perform better than any other. The result of this single-minded pursuit is well recognized by the ADC symbol, which is the hallmark that is trusted by laundries worldwide for total quality, the kind of quality that has helped establish American Dryer Corporation as the world's largest sole manufacturer of commercial laundry dryers.
